Yard Management

Simple Drag and Drop Yard Management
Intuitive drag and drop movement of cars makes keeping your yard organized simple.

Process Automation
Routine processes have been automated from tasklist (switchlist) creation to uploading car data, we have built-in automation to reduce time, simplify processes, and most importantly prevent human error.

Quick Classification, Visualization, and Sorting

Reports

### Simplified Billing with Custom Reports
We focused heavily on reducing admin time with the creation of Trackage. After you begin using Trackage, you will see how simple and intuitive creating reports can be.

Historic Data
Trackage presents data clearly in customizable pivot tables and is exportable to Excel or CSV.

AEI Reader Integration
We have designed Trackage to seamlessly integrate with AEI readers both through automatic syncing and through built-in access to analyze the raw reader data.

Customization

As if we haven't said it enough, Trackage has been designed to be flexible so that it can work with and integrate into any operation.

Optimal for use in:
- Rail Yards
- Short Line Railroads
- Loop Tracks and Terminals
- Ports
- Container Yards
- Rail Served Industry

Ask us about pricing, you may be surprised by the savings
